Campaign Spending: [List of Filers](#)

Aloha,

I want to thank you for visiting this site and taking the time to inform yourself, and hopefully others, on the issues involved in this election cycle.

My campaign primarily concerns itself with three green pillars. The first of these pillars concerns itself with that which the entire Hawaii Democratic Federal delegation has sold out on - the environment. From reckless votes that reversed thirty-years of environmental protections to loosening the regulations concerning the Endangered Species Act, the Hawaii delegation has sold the global environment to obtain selfish and equally misguided favors that benefit a few of our states citizens.

The second pillar is symbolic in nature. It symbolizes the green blood in my veins which further represents my military roots & dedication to the premise that we can have a strong transforming military, fight a war on terror, and continue to sustain benefits to our veterans – in short, we can have it all.

The final third pillar is my devotion to a strong sound fiscal policy and stable dollar. Without this, labor unions will continue to observe American jobs exported, pensions reduced, and the purchasing power of your savings account decline and force more people into low-income housing. As the world has caught on to the continuous decline in the value of the dollar they are selling dollar-based assets further exacerbating our unstable currency. Everything from Social Security to Prescription Drug Plans is suspect in such an environment.

Mahalo and God Bless,

Richard "Noah" Hough
